

# Effortlessly Run Your Entire IT Business

Remote Monitoring, Business Management , Service Desk and Cloud Services.  
Customer Happiness with One Platform.

## What is Atera?

# The only Modern, All-in-One Software for MSP's

From remote IT monitoring & management through powerful ticketing and customer satisfaction surveying to billing and invoicing, Atera brings the entire IT business together.

*Less hassle, more control and an MSP strategy that actually works.*

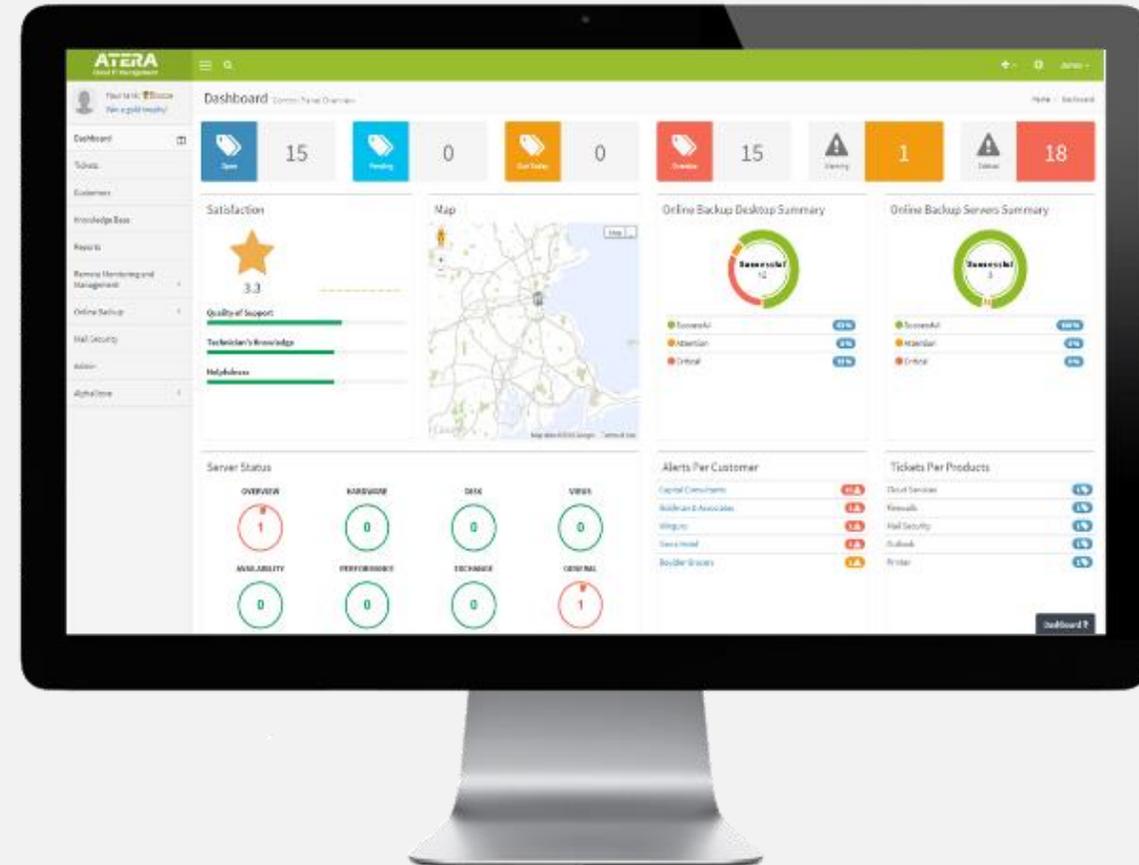

# The Solution

The only Modern, All-in-One Software for MSP's,

Atera has developed a cloud based, comprehensive system of management and support that systematically fully integrates four spaces:

- Technical management of the SMB's networks.
- Relationship & ServiceDesk management between the MSP and the individual SMB.
- Internal Business management of the MSP's Business.
- Integrated Cloud Services that the MSP purchases and sells to his customers.

# Modern Software

## All-in-One Software for MSP's

A simple to use, fully SaaS based software platform that includes all major elements of running an IT Business. With Simple and transparent pricing.

### Remote Monitoring & Management

Know about issues before your customers, powerful root-cause analysis, remote access, IT Automation, Patch Management and more..

### Service Management

Full management of the support and operational cycle, from alert to ticket to invoice. Includes CRM and technician management.

### Business Management

Complete business performance visibility for all aspects of the MSP's Business.

### Integrated Cloud Services

Driving fast growth with fully integrated, monitored and managed Cloud services.

### Affordable, transparent pricing

Simple, transparent pricing in the website. Simple and fast self-serve onboarding

"Atera has the sophistication, it has the scale, it has the functionality... and it has the vision that gives us the confidence to entrust our business and our customers to their platform"

@Jacques Huijbregts, CEO, Huijbregts Automatisering, The Netherlands.

# Real-Time Alerts

Know about issues before your customer

Receive real-time information and alerts regarding monitored devices: RAM usage, hard drive space, CPU load, anti-virus, operating systems and much more.

- **Hardware** deep monitoring and alerting.
- **Software** operating systems, application and specific services monitoring.
- **SNMP Monitoring** monitor all devices that are SNMP compliant.
- **Root cause analysis** identify the root causes of faults or problems
- **Connect** with one click remotely to monitored devices and fix problems.

The screenshot displays the ATERA Cloud IT Management dashboard. At the top, there's a navigation bar with the ATERA logo and user information. Below it, a 'Dashboard' section shows several key performance indicators (KPIs) in colored boxes: 'Open' (15), 'Pending' (0), 'Due Today' (0), 'Overdue' (15), 'Warning' (1), and 'Critical' (18). The dashboard also features a 'Satisfaction' widget with a 3.3 star rating, a 'Map' widget, and two 'Online Backup Summary' widgets showing 'Successful' rates of 63% and 100%. A 'Last 5 Alerts' pop-up window is prominently displayed in the foreground, listing five alerts for various devices, including 'Sisi' and 'DCVM-Tests', with details about fan speed, device response, IP address lease, DNS record deletion, and NTP client configuration. A 'Servers Status' pop-up window is also visible, showing a table of server health across categories like Performance, Hardware, Disk, Virus, Availability, Exchange, and General.

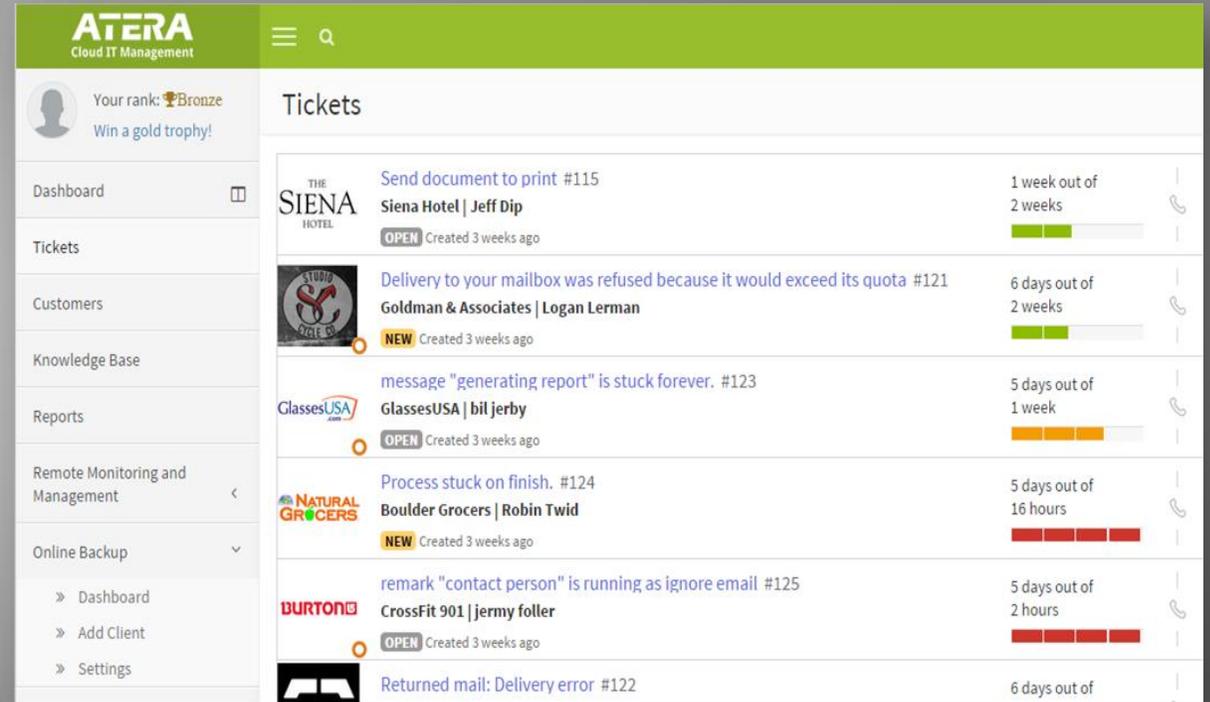

Alerts are sent to workstations, smartphones, specific designated employees and more.

# ServiceDesk

Contracts, Tickets, SLA's, Billing and more

Make sure every issue gets resolved. High level view of all tickets with flexible filtering and management capabilities.

- Multiple channels for receiving tickets; emails, portal and Agents.
- Automatic ticket Dispatching categorize, prioritize and allocate incoming tickets.
- Technician Individual view and automatic prioritization.
- Service Manager View for overall operational control.
- Reports and analytics

The screenshot displays the ATERA Cloud IT Management interface. The top navigation bar is green with the ATERA logo and a search icon. A left sidebar contains navigation options: Dashboard, Tickets, Customers, Knowledge Base, Reports, Remote Monitoring and Management, and Online Backup. The main content area is titled 'Tickets' and lists several open tickets with their respective client logos, titles, and SLA status. The tickets listed are:

Client	Ticket Title	Status	SLA Status
THE SIENA HOTEL	Send document to print #115	OPEN	1 week out of 2 weeks
STUDIO CITY	Delivery to your mailbox was refused because it would exceed its quota #121	NEW	6 days out of 2 weeks
GlassesUSA	message "generating report" is stuck forever. #123	OPEN	5 days out of 1 week
NATURAL GROCERS	Process stuck on finish. #124	NEW	5 days out of 16 hours
BURTONS	remark "contact person" is running as ignore email #125	OPEN	5 days out of 2 hours
	Returned mail: Delivery error #122		6 days out of

Ticket dashboard, automatically dispatches ticket to the right technician, sets priorities and sends alerts.

# Business Management

Control over Key Performance Indicators

No need to sort through useless information - only deal with what is most important to your business. Generate reports that track your most profitable customer, or find out which customer's retainer needs adjusting.

- **Profitability Reports** have a handle on customer profitability, margins and revenue.
- **Billing Reports** directly integrated with accounting system, generate invoices automatically.
- **Technicians KPI's** with a click of a button compare Technician performance.
